

Harvey Standing Seam Metal Roofing

Inventory

We stock a full inventory of metal roofing colors and accessories, along with tools you need to complete your project, available for rent and/or purchase.

Service

Our truck will roll out, cut, and drop panels at your jobsite so there's no crating or long lead times.

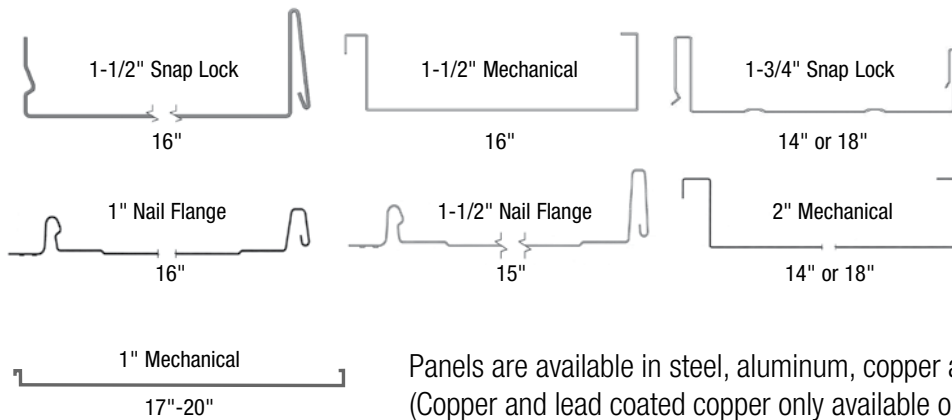

Training

We will provide you with hands-on training at your jobsite. We also hold regular product installation demonstrations; check your local branch for details.

Estimating

A Harvey sales rep can visit your jobsite and address any questions before your job begins.

Profiles

Panels are available in steel, aluminum, copper and lead coated copper. (Copper and lead coated copper only available on mechanical panels.)

Stock Colors

Additional Low Gloss Colors

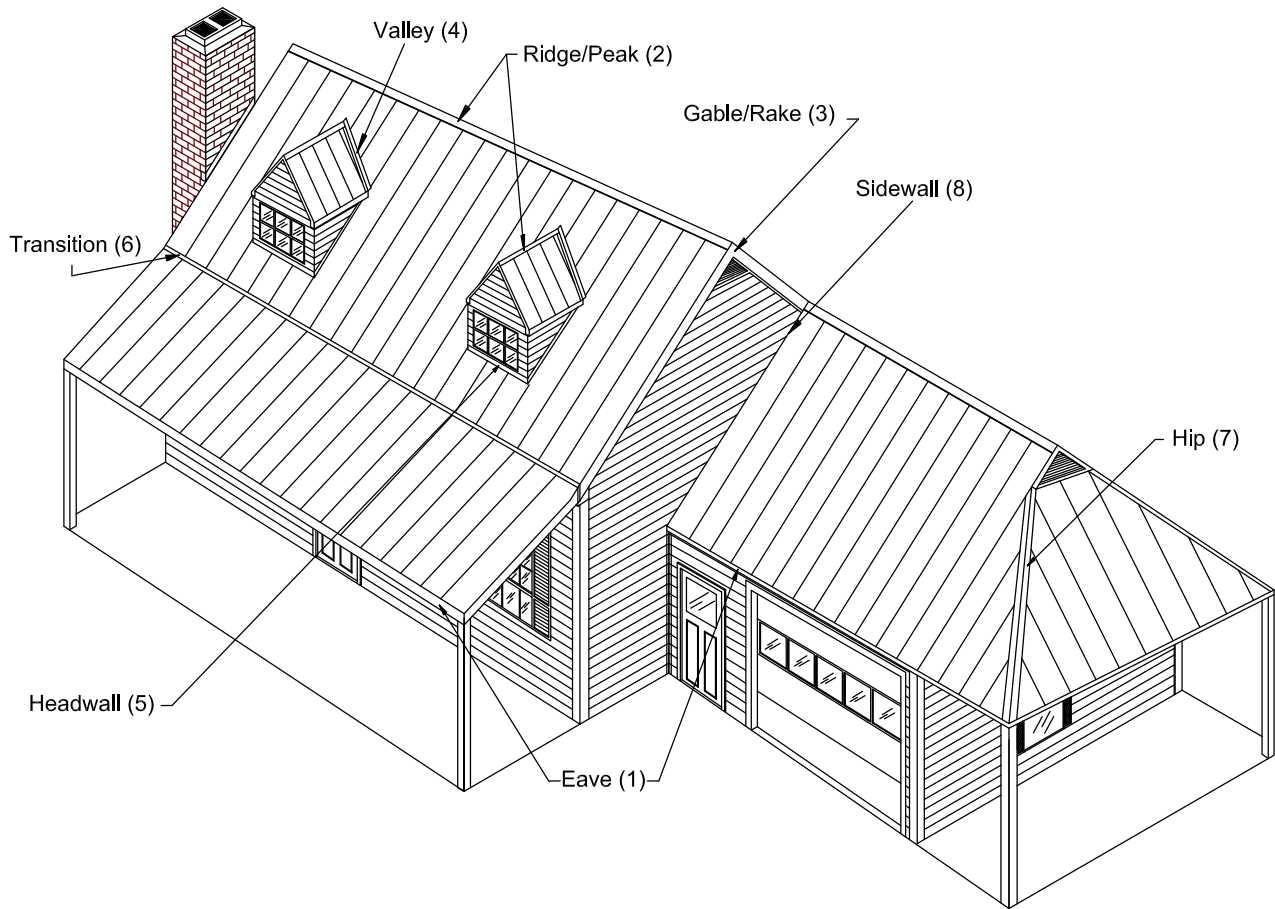

We recommend Harvey Roofing Solutions Synthetic Underlayment and Ice Dam Protection for installation under our metal roofing. Ask your local branch for details.

About Harvey Building Products

Harvey Building Products is a leading manufacturer and distributor of high-quality building products. Founded over 50 years ago in 1961, Harvey is a family-owned and operated company headquartered in Waltham, MA. Our manufacturing facilities are located here in the Northeast, where we build our windows to withstand the harsh conditions that often affect our area. Unlike some companies, we are one of the few window manufacturers in the U.S. that designs all of its own window products.

Harvey distributes a full line of wholesale building products through contractors and builders through our branches renowned for superior service. These include products Harvey manufactures as well as products from our partners, including siding, roofing, windows, doors, and decking. We also strive to be a positive force in the community, as well as a responsible environmental citizen.
