

# ACCU-FIT

## Vinyl Enclosure System

**VERTICAL**

The Accu-Fit Vinyl Enclosure System is a **non-load bearing 3-1/4" wall system** providing maximum flexibility and ease of installation, and can be used in openings that are plumb, level and square (tolerance of 1/4"). Rolling, double hung, picture window or casement can be used in the system.

The structural receiver frame uses heavy, thermally broken aluminum extrusions. Full screens with fiberglass wire and stainless steel installation screws are included.
